Quality Assurance Engineer

OVERVIEW

Company Description:

Tagup is reinventing the way industrial businesses track equipment data. We connect industrial equipment to the Internet, monitoring controls data, maintenance actions, and any variety of non-operational data in real-time. Our team's core machine learning technologies were developed at MIT's Computer Science and Artificial Intelligence Laboratory.

We have a variety of projects with leading industrial companies around the world, and are growing the team to deliver a powerful solution to our customers. Team members will have the opportunity to work closely with the founding team at a rapidly growing startup.

Location:
Somerville, MA

POSITION DESCRIPTION

In this position, you will assess software quality through manual and automated testing. You will work closely with the founders and field engineering to deliver a cutting-edge solution to our industrial clients. We are seeking talented QA Engineer to assess software quality through manual and automated testing.

Responsibilities:
- Review and analyze system specifications
- Consistently execute test cases (manual and/or automated) and analyze results in a timely manner
- design test data sets and create automated tests
- Evaluate product code according to specifications

Desired skills:
- 2+ years of QA testing or similar experience
- Competence in all technical skills needed to document and troubleshoot errors
- Experience and familiarity with test management software (e.g. qTest, Zephyr) and SQL

Bonus Points:
- Expertise in Nightwatch.js framework
- Working knowledge of regression testing
